

Science

Years 1 and 2

During Term 1 students in Years 1/2 will be focussing on 'Biological Sciences'. They will be exploring living things, how they grow, change and have offspring similar to themselves.

Throughout Term 1 students will explore the local environment of the school grounds, identifying animals and plants at different stages of their life cycles. Year 1/2's will be introduced to a new animal/plant each week with hands on and virtual activities.

This term they will complete a small project where they will research a favourite/interesting animal or plant and present their work to their classmates.
