

Visual Arts

During Term Two, the students in Years 1 and 2 will study colour. They will revise their knowledge of colour and they will be shown how to mix primary, secondary and tertiary colours and place them correctly on a colour wheel. The temperature of colours and how they can be used to show emotions will be revised as well. They will create their own colour wheel using only the primary colours and colour mixing skills.

Art lessons will complement Integrated Inquiry work in classroom lessons. The students will look at the artwork from different countries and cultures and will be shown how art is an important feature of many celebrations.

Students will extend their painting and printing skills to create their own art works inspired by the cultures that they have studied.
