

Student Goals

The regular setting of individual student goals is integral to building student's capacity to learn. We believe that students who set their own learning goals and targets have greater confidence to take on more challenging tasks, regardless of their ability. Their motivation to improve and master a task increases and their self-esteem remains strong, even in the case of failure.

In Years 1 and 2, goals are discussed and collaboratively set between students and teachers in the areas of reading, writing, maths and personal goals. Students regularly reflect on their progress towards these goals, recording their thoughts. This is shared with the teacher during a conference and the next steps for learning are discussed.

Achieved goals are communicated to home through Seesaw so that families can share the learning journey and celebrate success together.
