

SHINE

The social and emotional wellbeing of our students is a top priority at CSPS. As Term 2 brings some new challenges with remote and flexible learning, navigating new environments and adapting to change, the social and emotional welfare of our students continues to be at the forefront of all that we do.

This term, staff and students work together to reflect on emotions and explore strategies for self-regulation when experiencing these emotions. Students will be provided with opportunities to participate in circle time where they can raise questions or issues relating to their learning and wellbeing.

Students will continue to explore and show our new school values and what each of these looks like, feels like and sounds like both in the classroom and in outdoor spaces.
