Integrated Inquiry

The year 3/4 learning community continues in term 4 with an Integrated Inquiry unit of work that has a focus on Design and Technology. The unit 'Design and Technology', sets the standard for developing new skills and understandings built around the Victorian Curriculum areas of Technologies and Science.

Students will Investigate how forces and the properties of materials affect the behaviour of a designed solution. They will Critique needs or opportunities for designing and explore and test a variety of materials, components, tools and equipment and the techniques needed to create designed solutions. They will also Generate, develop, and communicate design ideas and decisions using appropriate technical terms and graphical representation techniques.

This unit of Inquiry ensures every student is well prepared and supported to build positive relationships with peers, teachers and other community members.
