

Visual Arts

During Term Two, the students in Years 5 and 6 will be studying colour. They will revise and extend the knowledge that they already have about the colour wheel. Lessons will provide more detailed information about colour theory; in particular the hues, tints, tones and shades. They will use this learning to guide them with the use of the iPad app 'Brushes Redux'. After studying the artwork of Vincent Van Gogh, they will use 'Brushes Redux' to create their own version of one of his paintings.

The theme for art lessons will complement the Integrated Inquiry work in classroom lessons. The students will look at paintings that demonstrate feelings associated with immigration and that depict different cultures and landscapes.

They will combine painting and photography to tell an immigration story.
