

Physical Education

During Term Two, we hope to finish our work regarding lawn bowls which was unable to be finished due to unforeseeable circumstances in term one. Our term two focus in Years 5 and 6 will investigate activities in preparation for our House Athletics. The students will also work on their hitting/striking and fielding skills to create their own game.

During athletics, students will work on their skills and relate them to the Olympic Principals of faster, higher and stronger. The focus will be developing to achieve personal bests through effort, technique and strategy.

Hitting and striking skills are an important part of the PE curriculum as is developing an understanding of rules and developing strategies in game play. Our 'Make a Game' unit will encourage students to think creatively about a game, rules and skills that must include striking and fielding. Thus developing skills and game sense understanding in an engaging way.

At the time of writing all sporting excursions have been postponed and possibly cancelled. This includes many of the activities often undertaken in term two such as District Cross Country and Lightning Premiership.
