

SHINE

The social and emotional wellbeing of our students is a top priority at CSPS. As Term 2 brings some new challenges with remote and flexible learning, navigating new environments and adapting to change, the social and emotional welfare of our students continues to be at the forefront of all that we do.

During Term 2, the Prep students will focus on emotional literacy as they identify and explore some common emotions they experience.

They will be encouraged to talk about their feelings, identify the response their body has to various emotions and then discuss strategies to deal with each emotion.

Building and maintain friendships, sharing and working cooperatively with others are also important aspects of the Term 2 program.

Students will explore our new school values and what each of these looks like, feels like and sounds like both in the classroom and in outdoor spaces.
